## Property: justify-content

```
justify-content: flex-start;
```

```
justify-content: flex-end;
```

```
justify-content: center;
```

```
justify-content: space-around;
```

```
justify-content: space-between;
```

## Property: `align-items`

```
align-items: flex-start;
```

```
align-items: flex-end;
```

```
align-items: center;
```

```
align-items: stretch;
```

```
align-items: baseline;
```

# Property: `flex-wrap`

`flex-wrap: nowrap;`

`flex-wrap: wrap;`

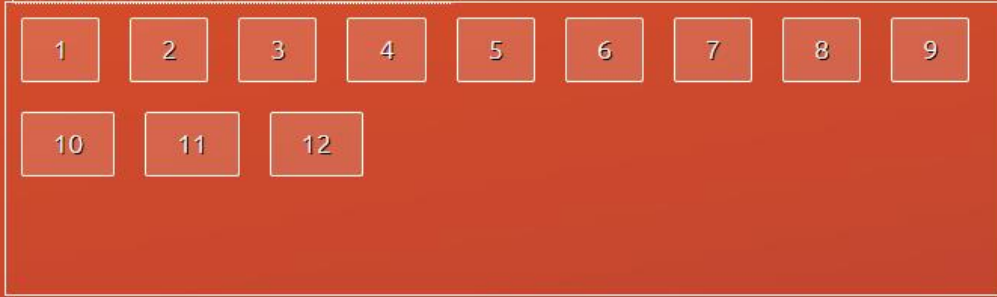

`flex-wrap: wrap-reverse;`

## Property: align-content

`align-content: flex-start;`

`align-content: flex-end;`

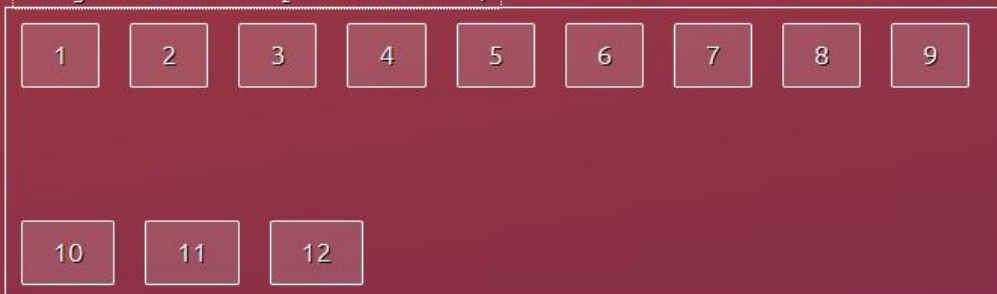

`align-content: center;`

`align-content: space-around;`

`align-content: space-between;`

## Property: `order`

Default order

1 order: 0	2 order: 0	3 order: 0	4 order: 0
---------------	---------------	---------------	---------------

2 and 3 with custom order

2 order: -1	1 order: 0	4 order: 0	3 order: 1
----------------	---------------	---------------	---------------

All with custom order

3 order: 1	2 order: 2	4 order: 2	1 order: 3
---------------	---------------	---------------	---------------

## Property: align-self

`align-self: flex-start;`

`align-self: flex-end;`

`align-self: center;`

`align-self: stretch;`

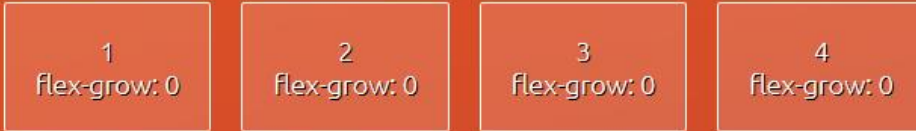

`align-self: baseline;`

# Property: `flex-grow`

Default: `flex-grow: 0` (remaining space not filled)

Four boxes of equal width, each containing the number 1, 2, 3, or 4 and the text `flex-grow: 0`. The boxes are separated by small gaps.

3 allowed to take remaining space ( `flex-grow: 1` )

Four boxes. Boxes 1 and 2 are of equal width and contain the number 1 and 2 with `flex-grow: 0`. Box 3 is significantly wider than boxes 1 and 2, contains the number 3 and `flex-grow: 1`. Box 4 is of equal width to boxes 1 and 2, contains the number 4 and `flex-grow: 0`.

Remaining space distributed equally (all have same `flex-grow` )

Four boxes of equal width, each containing the number 1, 2, 3, or 4 and the text `flex-grow: 1`.

3 gets 2/5 (40%) of remaining space (does not mean that 3 will be twice as wide)

Four boxes. Boxes 1, 2, and 4 are of equal width and contain the number 1, 2, or 4 with `flex-grow: 1`. Box 3 is wider than boxes 1, 2, and 4, contains the number 3 and `flex-grow: 2`.

3 gets 4/7 of remaining space

Four boxes. Box 3 is the widest, contains the number 3 and `flex-grow: 4`. Box 1 is the next widest, contains the number 1 and `flex-grow: 1`. Box 4 is the next widest, contains the number 4 and `flex-grow: 1`. Box 2 is the narrowest, contains the number 2 and `flex-grow: 1`.

## Property: `flex-shrink`

Default: `flex-shrink: 1` (flex items are allowed to shrink to some degree)

1 flex-shrink: 1	2 flex-shrink: 1	3 flex-shrink: 1	4 flex-shrink: 1	5 flex-shrink: 1	6 flex-shrink: 1
------------------------	------------------------	------------------------	------------------------	------------------------	------------------------

3, 4, and 5 are no longer allowed to shrink ( `flex-shrink: 0` )

1 flex-shrink: 1	2 flex-shrink: 1	3 flex-shrink: 0	4 flex-shrink: 0	5 flex-shrink: 0	6 flex-shrink: 1
------------------------	------------------------	---------------------	---------------------	---------------------	------------------------

3 and 4 are allowed to shrink more compared to other flex items

1 flex-shrink: 1	2 flex-shrink: 1	3 flex-shrink: 5	4 flex-shrink: 5	5 flex-shrink: 1	6 flex-shrink: 1
------------------------	------------------------	------------------------	------------------------	------------------------	------------------------

## Property: `flex-basis`

Default: `flex-basis: auto`

1 flex-basis: auto	2 flex-basis: auto	3 flex-basis: auto	4 flex-basis: auto
-----------------------	-----------------------	-----------------------	-----------------------

Different `flex-basis` values (act like width on the main axis)

1 flex-basis: 200px	2 flex-basis: 300px	3 flex-basis: auto	4 flex-basis: 100px
------------------------	------------------------	-----------------------	---------------------------

Percent values (note that it's necessary to combine with `flex-shrink` )

1 flex-basis: 25%	2 flex-basis: auto	3 flex-basis: auto
4 flex-basis: 50%		

## Property: `flex`

Default: `flex: 0 1 auto` (grow, shrink, basis)

1 flex: 0 1 auto	2 flex: 0 1 auto	3 flex: 0 1 auto	4 flex: 0 1 auto
---------------------	---------------------	---------------------	---------------------

`flex: 1` is the same as `flex: 1 1 0%`

1 flex: 1	2 flex: 1	3 flex: 1	4 flex: 1	5 flex: 1	6 flex: 1	7 flex: 1	8 flex: 1
--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------

Flex items stick to 25% width (works due to `flex-wrap: nowrap`, thus only for one row)

1 flex: 1 1 25%	2 flex: 1 1 25%	3 flex: 1 1 25%	4 flex: 1 1 25%
--------------------	--------------------	--------------------	--------------------

Example from `flex-basis` section, now combined with other properties

1 flex: 0 1 25%	2 flex: 1 1 auto	3 flex: 1 1 auto	4 flex: 0 1 50%
--------------------	---------------------	---------------------	--------------------
